MAISON KATERINA SIBILIA

Maison KATERINA SIBILIA creates fine jewellery carrying deep meaning, revealed by light.

Engagement Ring: You Are My Constellation

In daylight, the ring sparkles with natural diamonds selected for their beauty, clarity and brilliance.

Under ultraviolet light*, the pavé diamonds reveal their natural fluorescence.

Founded in Hatton Garden, the historic heart of London's diamond district, the Maison is rooted in the craftsmanship and traditions of European fine jewellery.

**Note: Ultraviolet light is most commonly experienced in nightlife environments. Our Maison has developed a bespoke jewellery box specifically designed for the client experience.*

FOUNDER AND CREATIVE DIRECTOR

GIA Graduate Gemologist and Former De Beers executive with over a decade of experience in the diamond industry, Katerina Sibilia combines diamond expertise, design sensibility and fine jewellery craftsmanship.

2026 COLLECTION

Inspired by the hydrangea, a flower of nuance and transformation, the *MY SECRET GARDEN* collection celebrates the many facets of femininity and invites us to believe in our inner light and allow it to guide us.

UV DISPLAY CASE FOR RETAIL

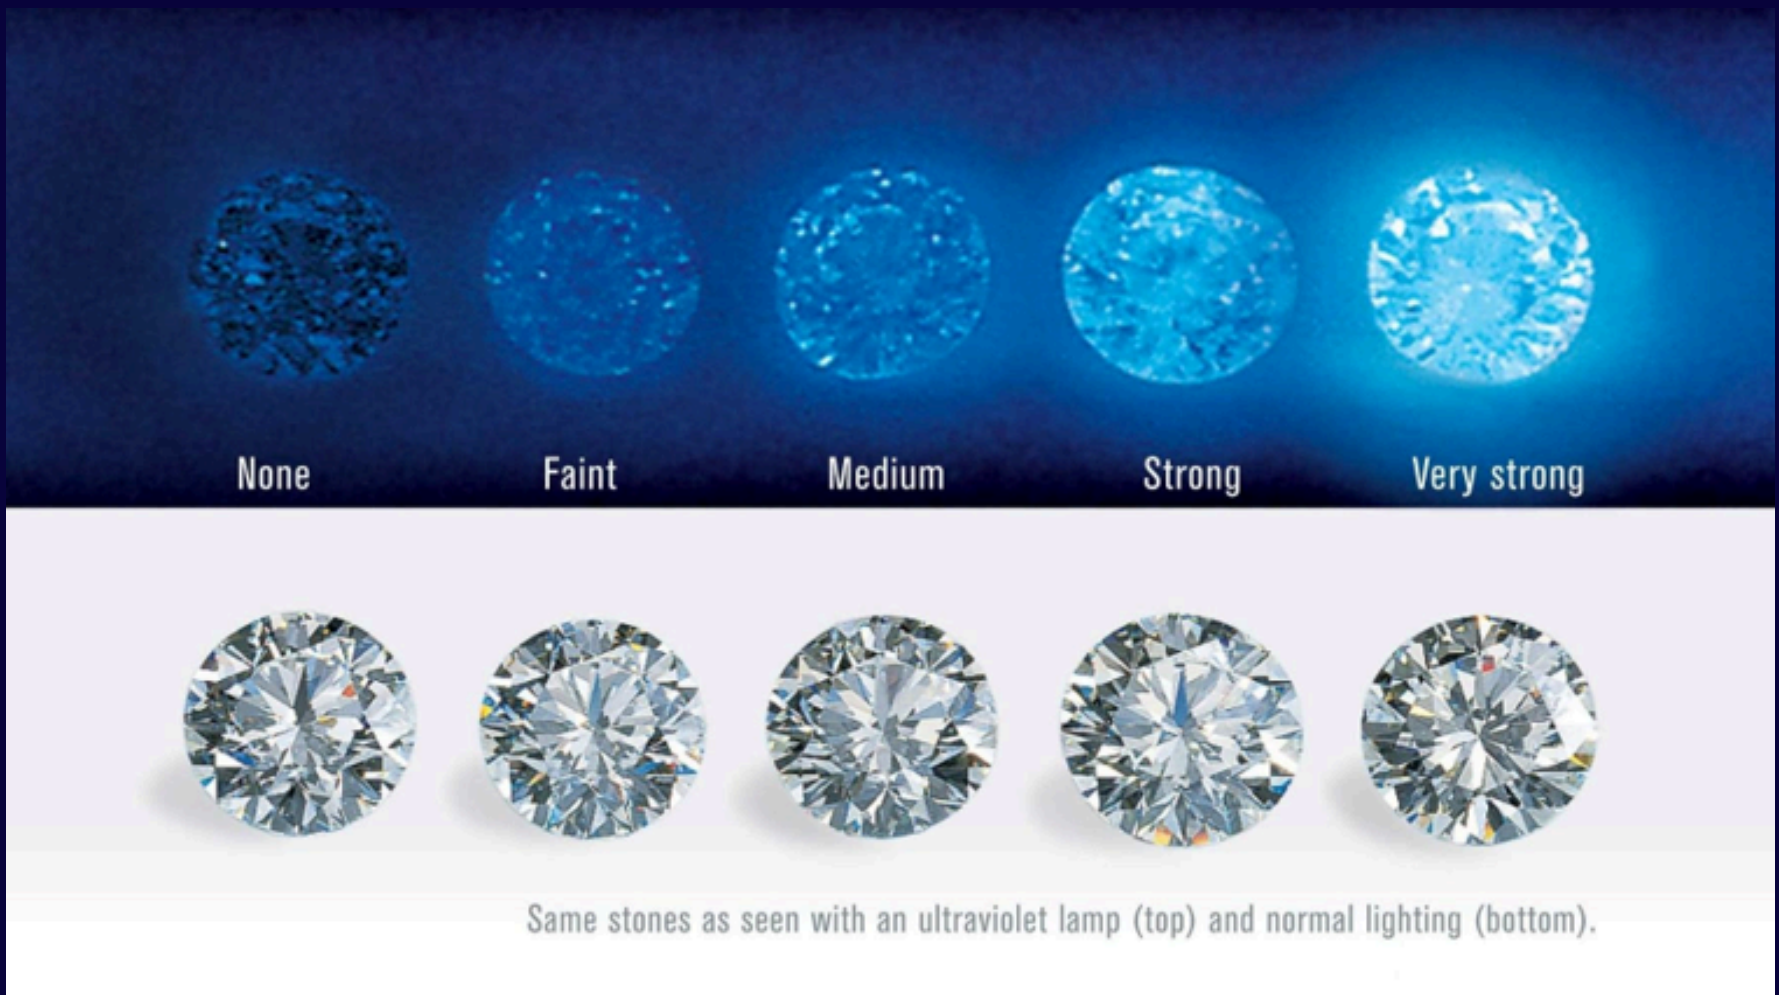

PACKAGING

- Jewellery box with integrated UV light
- Rechargeable via USB-C
- Matching KATERINA SIBILIA presentation bag

FLUORESCENCE IS 100% NATURAL

Fluorescence is the coloured glow emitted by certain diamonds when exposed to ultraviolet light.

It is an additional diamond characteristic, distinct from the traditional 4Cs: carat, colour, clarity and cut.

Fluorescence is rare: fewer than 10% of diamonds exhibit fluorescence.
